

Dated: August 11, 2026

Cognizant Technology Solutions Canada Inc.

7100 West Credit Ave, 2nd Floor, Mississauga, ON L5N 0E4

6940 Mumford Road, Suite 210, Halifax, Nova Scotia B3L0B7

To Whom It May Concern:

Dear Sir/Madam,

This is to confirm that **Bharanidharan B (ID - 283806)** is employed full-time permanent in the following capacity with our company located at 6940 Mumford Road, Suite 210, Halifax, Nova Scotia B3L0B7. Please see below Bharanidharan B's employment details:

Job Title	Specific Period of Employment	Weekly working hours	Location City and Country
Manager - Projects	January 31, 2023 to July 06, 2025	45	Chennai[Tamil Nadu], India

Main Duties Include:

As Manager – Projects, Mr. Bharanidharan B was responsible for analyzing business requirements received from the onsite team to design and develop new cloud-based products and solutions, and for designing cloud infrastructure architectures that meet high availability, performance, scalability, security, and cost efficiency. He built proof-of-concepts and proposed technical solutions for complex business requirements, and developed and reused CloudFormation Template scripts to provision AWS resources and automate infrastructure builds per coding and security standards. He designed and deployed serverless applications using AWS Lambda, API Gateway, S3, RDS, and IAM, including parallel deployment through Azure DevOps pipelines to improve efficiency, and developed data processing solutions using Java and Python AWS Lambdas, PostgreSQL stored procedures, and RDS for outbound data generation and SAP IDoc integration. He managed end-to-end AWS infrastructure covering administration, development, deployment, migration, and support across multiple accounts, and configured network access, security controls, and user permissions to manage internal and external traffic and safeguard the environment. He monitored application services and troubleshoot issues using CloudTrail and CloudWatch, created dashboards and reports for management review, led security discussions, proposed threat-mitigation solutions, and enforced code coverage, vulnerability scanning, and security best practices. He conducted resource audits for cost optimization, documented architecture diagrams and implementation steps as knowledge artifacts, and prepared detailed implementation and rollback steps for scheduled maintenance activities. He managed the offshore development team, allocated tasks, tracked progress, and participated in daily status calls with the onsite team to coordinate tasks, prioritize work, and drive collaborative delivery.

Manager - Projects	July 07, 2025 to Till Date	40	Halifax[Nova Scotia], Canada
--------------------	-------------------------------	----	---------------------------------

Main Duties Include:

As Manager – Projects, Mr. Bharanidharan B was responsible for gathering and analyzing business requirements directly from stakeholders through in-person meetings and workshops to design and develop new cloud-based products and solutions, and for designing cloud infrastructure architectures that meet high availability, performance, scalability, security, and cost efficiency. Working closely with stakeholders on-site, he built proof-of-concepts and proposed technical solutions for complex business requirements, and developed and reused CloudFormation Template scripts to provision AWS resources and automate infrastructure builds per coding and security standards. He designed and deployed serverless applications using AWS Lambda, API Gateway, S3, RDS, and IAM, including parallel deployment through Azure DevOps pipelines to improve efficiency, and developed data processing solutions using Java and Python AWS Lambdas, PostgreSQL stored procedures, and RDS for outbound data generation and SAP IDoc integration. He led requirement-finalization discussions and design walkthroughs with stakeholders, coordinated maintenance windows and downtime approvals directly with users, and served as the primary point of contact for critical escalations. He monitored application services and troubleshoot issues using CloudTrail and CloudWatch, created dashboards and reports for management review, led security discussions, proposed threat-mitigation solutions, and enforced code coverage, vulnerability scanning, and security best practices. He conducted resource audits for cost optimization, documented architecture diagrams and implementation steps as knowledge artifacts, and conducted knowledge-sharing sessions for stakeholders and end users. He also bridged communication between the onsite stakeholders and the offshore delivery team, translating business needs into technical requirements and driving collaborative delivery.

Bharanidharan B's last drawn annual salary was INR 31,35,000 which includes Bharanidharan B's target bonus component of INR 1,50,000 per annum.

Bharanidharan B's current annual salary is CAD 127,200.
